

*FAQs on *99# Service*

1. What is *99#?

*99# is a USSD (Unstructured Supplementary Service Data) based mobile banking service from NPCI that brings together diverse ecosystem partners such as Banks & TSPs (Telecom Service Providers). Using *99# service, a customer can access financial services by dialling *99# from his/her mobile registered with the bank. The service works across all GSM service providers and handsets.

2. What is USSD?

Unstructured Supplementary Service Data (USSD) is a technology unique to GSM (Global System for Mobile Communications) handsets. It is a capability built into the GSM standard to support transmitting information over the signalling channels of the GSM network. USSD provides session based communication, enabling a variety of applications. USSD technology, which was primarily used in the field of telecommunication, is going to make a significant impact in the field of banking services.

3. What are the key features of *99# service?

- Works without Internet – Uses voice connectivity
- Accessible through a common code *99# across all TSPs
- No additional charges while roaming for using the service
- Works across all GSM service providers and mobile handsets
- Round the clock availability to customers (works even on holidays)
- No need to install any application on mobile handset to use the service
- Additional channel for banking services and key catalyst for financial inclusion

4. What are the various services available under *99#?

*99# service can be used by the customers for the following purposes:

- a) Financial
- b) Non-Financial
- c) Value Added Services (VAS)

Currently, following Financial, Non-financial and Value Added Services (VAS) are offered through *99# service.
